

CDP public corporate scores

A record 22,700+ companies were scored by CDP in 2024, assessing their transparency and action as they work to integrate Earth-positive decisions and build more resilient business models. **Explore the CDP public scores for 2024 in full below.**

More companies than ever received a score on forests and water security, with the first year of disclosure through CDP's single corporate questionnaire powering significant increases in disclosure across environmental issues.

Manufacturing made up the highest proportion of companies scored at a sector-level, with 39% in climate, 42% in water, and 25% in forests.

22,400

companies received a climate score.

1,600+

companies received a forests score.

6,500+

companies received a water score.
